EQUIPMENT LIST, FACILITIES & SERVICES

SALES OFFICES

Sandy Alexander is one of the country's largest and most respected full service graphic communication companies. We provide our customers with extensive web and sheetfed printing capabilities; in-line finishing and in-line ink jet imaging; digital and 1-to-1 marketing solutions; retail visual merchandising (RVM) and wide & grand format printing; all complemented by a wide array of studio services including creative retouching and CG (Computer Graphics) and other digital and electronic media services.

Manufacturing Facilities

Our commitment to providing quality and environmentally responsible print solutions is evidenced by our ISO 9001:2008 and ISO 14001:2004 certifications. In addition, we are tri-certified for chain-of-custody sustainable paper (FSC, PEFC and SFI). We purchase 100% of our electricity requirements from renewable wind power, are a certified Sustainable Green Printer (SGP), and have been awarded the What They Think! Environmental Innovation Award for the design and building of our RVM facility.

Over the past four decades, we have served the corporate communication, cosmetic, pharmaceutical, automotive, financial, graphic design, advertising, and promotion industries. We have consistently been recognized for our technical expertise, an innovative approach to our business, and a desire to work as partners with our clients. This commitment has earned us a reputation for maintaining the highest standards of excellence in the industry.

We can provide you with one single resource for all your graphic communication needs.

ELECTRONIC PREPRESS & COLOR SEPARATION

New York, NY - SALT Studios

Salt Studios, a high-end visual media production boutique located in New York City specializing in CG and creative retouching. Our capabilities include: transformative retouching, cost effective inventive computer generated graphics (CG), empowered motion effects, and other valued added services. Salt Studios is a separate, wholly owned subsidiary of Sandy Alexander.

- Kodak/CREO Print Console workstations (2)

Proofing Equipment

- Epson Stylus Pro color proofers with K3 ultrachrome ink (3)

Press Equipment

- Heidelberg/Harris-M110- 6 unit heatset web press. 26.5" max width with 17.75" cutoff. Delivery capabilities include sheeter and finishing line.
- Heidelberg M600- 6 unit heatset web press. 38" max width with a 22.75" cutoff. Delivery capabilities-finish line.
- Heidelberg/Goss M600- 7 unit heatset web press. 38" max width with 22.75" cutoff. Delivery capabilities include sheeter and finishing line.

In-Line Finishing Capabilities

- Pattern Gluers - For pattern glue and scratch-off material
- Die-Cut Units - For windows, special effects, contours, flaps
- Ribbon Deck-Up - For up to 4 ribbons from 1 web - can be stacked in any sequence and can turn over
- Pocket Gluer Folder - For gluing and forming two envelopes
- Portable Glue Unit - For special applications
- Folding Stations - Can fold up or down, from 1" to 18", can create 4-7 folds depending on the press
- Scenting - Wide variety of in-line scenting applications include Snap and Burst and Scratch and Sniff
- Rotary Cutter - For odd shape cuts and special effects
- Closed End Mailer - Has the ability to create envelopes and components in one pass

Ink-Jet Imaging

- Scitex controllers, capable of driving up to 8 print stations each (3) Scitex mobile RIP allowing 4 additional print stations
- Scitex print stations capable of printing at 1000 ft/min (10)
- Scitex 4- 1/4" Ink-Jet Heads (19)

Variable Data/Mailing Software/ Mail Tracking

- GMC PrintnetT Triple Suite
- Windowbooks
- Track & Trace

Specialties List

- Bar code printing, brochures, coupons, postcards
- FSC Certified, ISO Certified
- Graphic design services
- Mailing services
- Custom in-line finished piece design, we work with each client to create dynamic and interactive pieces

**RETAIL VISUAL
MERCHANDISING
WIDE & GRAND FORMAT
PRINTING**
Clifton, NJ

Scan Image for Video: See back inside cover for instructions

Our Retail Visual Merchandising resources are the most advanced in the marketplace providing global brand consistency, speed-to-market velocity, and on-demand flexibility; from prototype development, to manufacturing and distribution logistics. All under one roof. Specializations include: creative services, advanced marketing technology support, complete project solving, extensive substrate, production applications and the industry's most sophisticated campaign logistics system, making the complex world of RVM distribution worry free.

**Printing Equipment
Minmaki Die Sub Printer (2)**

- 10' Printer

Minmaki Die Sub Printer

- 63" Printer

Durst 500 (3)

- High volume/High quality 16' roll to roll machine
- Prints at 600 DPI
- 6/C + white + 6/C
- Run 1 large roll or multiple small rolls with individual job queues

Durst 900

- High volume/High quality 8.5' flatbed or roll to roll machine
- Run rigid substrates up to 2" thick or rolls of material
- 600 DPI
- 6/C + white + 6/C
- Fully automated feed table for continuous feed of rigid material

Lambda 130 plus (2)

- Digital photographic enlargers. Produce continuous tone RGB images on light sensitive photographic material. Output images at either 200 or 400 LPI. Produce prints that are 50" wide by the length of the roll of material (164').

Lightjet 5000XL

- Same characteristics as the Lambda. Can produce prints that are 72" W by 120" L. Output resolution of this unit is either 200 or 300 LPI. Continuous tone so it provides a smoother image than inkjet.

Klieverik

- 10' Heat Transfer Printing Calendar Machine

Finishing Equipment

AGL 64" and 80" laminators

- Mounting, laminating and encapsulation. Have heated top and bottom rollers in order to do hot lamination. Can mount to various substrates up to 2" thick.

Kongsberg XP-24-I-Cut Digital Die Cutter

- High speed cutter/router capable of cutting rigid and roll to roll substrates.
- Designed for 24/7 production
- 66" X 120" routing table

Fotobo X/Y Cutters (2)

- Machines are fully automated and do accurate X/Y cutting of the roll material printed on the Durst Printers with proprietary registration marks.

Durst XY Cutters (3)

- 3 units allows us to fully auto cut prints as small as 5" X 5" and up to prints that are 48" X 96".

70' Miller Weldmaster with In-Line Grommet machine

- Hot air welder for finishing of vinyl banners and billboards. In-line grommet machine allows for simultaneous welding and grommeting.

50' FIAB 800

- RF Welder for finishing or vinyl banners, billboards and select fabrics.

Sewing Machines (3)

- Matic Plus Sewing System
- Juki Sewing Machine
- Industrial machines for finishing fabrics, vinyl, Tyvek, etc.

FULFILLMENT & KNITTING Clifton, NJ

Services Include

- Order placement via phone, e-mail, and online cataloging
- Mailing data processing/cleansing
- Pick, sort, collate, insert, basic assembly/disassembly, pack
- Print-on-demand basic printing (labels, letters)
- One-to-One variable data printing for high level personalization
- Sourcing envelopes/corrugated shippers, etc. for special mailings
- Shipping, mailing
- Returns & restocking management
- Obsolete/unwanted inventory disposal
- Reporting: inventory levels, shipping activity, returns, back orders

Sandy Fulfillment is Sandy Alexander's high security/high volume fulfillment and kitting center. This includes a warehouse with racks and key card access for security that can be linked to an online storefront for ease of use. Our center can handle projects requiring a web-based real time inventory tracking system that utilizes web-based bar coding technology.

A print-on-demand (POD) system prints and fulfills material when needed reducing your cost, inventory, and providing updated material on a timely basis. POD reduces obsolete material resulting in a positive impact on the environment.

AUTOMATED REALITY

HOW IT WORKS:

Some of the images in this brochure have been enriched with LAYAR, (a phone app) and contain digital content that you can view using your smartphone.

Follow the steps below to view these photos.

Step 1: Download the free Layar app for iPhone or Android.

Step 2: Look for pages with the Layar logo.

Step 3: Open the Layar app, hold the phone above the page and tap to scan it.

Step 4: Hold your phone above the page to view the interactive content.
